The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none"> • address core LLN issues in training and assessment practice on at least two different occasions • provide evidence that includes: <ul style="list-style-type: none"> • documentation setting out activities, resources and individual learning plans for a particular learner • third-party observations of the candidate with a range of learners • documentation of the use of the ACSF to determine LLN level.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to: <ul style="list-style-type: none"> • specialist LLN practitioners for consultation and verification of approaches • tools based on the ACSF levels • training package support materials.
